

## Information Technology Outsourcing

Antares Management Solutions provides proven information technology outsourcing, managed services, and consulting solutions to businesses in various industries.

We offer a cooperative and flexible approach to meet your varying needs, whether it is mainframe, midrange or client server systems. Our state-of-the-art systems architecture, relationship management practices and quality performance metrics are crucial to ensuring the success of our clients, both now and in the future.

Antares strives to deliver an immediate, positive business impact by providing you with a solid infrastructure and solutions that ensure a continued, competitive and strategic advantage.

### IT Outsourcing and Managed Services

Antares understands the broader organization, management and dimensions of IT systems. We leverage our expertise, existing resources and strategic partnerships to offer our clients cost reductions and improved service levels. Antares experts can handle your IT needs on an outsourcing or managed service basis:

- Data Center Hosting
- Hardware & Software Support
- Help Desk
- Network Management
- Disaster Recovery

### IT Consulting Services

Antares' technology experts are available on a consulting basis. We can provide the leadership and experience you need to ensure successful and timely implementation of your IT initiatives including:

Data Center Consolidation	Distributed Computing
Capacity Planning	E-Business
Data and Network Security & Design	IT Strategy
Voice & Data Communications	Project Management
Disaster Recovery Planning	

### The Antares Advantage

Antares has strengths that give us a competitive edge over others in the market. Nowhere else will you find the combination of service level delivery, account management support, technology expertise and the resources and flexibility to offer complete IT solutions. Helping our clients stay on top of changing technology is what we do best.
